

Sanitary Sewer Replacements
VA244-16-C-0398
Coatesville VAMC, Coatesville, PA

Additional Pre-Bid Questions & Answers

Q12. Is a plumber required for work inside the building?

A12. Refer to new Specification Sections 22 05 11 and 22 13 00, attached.

Q13. Is the replacement piping in the building to be hung from pipe hangers or supported from underneath?

A13. Refer to new Specification Sections 22 05 11 and 22 13 00, attached.

Q14. Are there any details or specifications for the "Design Build Structural Engineered" steps other than 50 feet long with an 11 foot grade change? Is there any width requirement or is that up to the contractor to determine?

A14. Step width as well as other requirements are identified in the referenced material.

Q15. As far as the design, do we submit for approval or accept a registered engineers design as approved already?

A15. All submittals are subject to review.
